WHAT'S THE  
**KEY**  
TO SUCCESS?

# Urge the Legislature to Stay on Track for School Funding Reform— Because a Great Education is the **KEY** to **SUCCESS**

ESPECIALLY in tough times like these, a quality education is the key to giving Pennsylvania's children a chance to get ahead and build a middle-class life. That's why it's so important that we use federal stimulus money to stay on track with the 6-year plan to fund Pennsylvania's schools in a stable way that gives every student the ability to succeed and ends our over-reliance on property taxes.

Ask your legislators to reject cuts to education funding to protect Pennsylvania's future:

- Call Rep. [last name] at [xxx.xxx.xxxx]
- Return the card below

## A Strong Education System Means a Stronger Economy

Better jobs will provide a stronger future for our state and our communities.

## Our State Constitution Mandates a "Thorough and Efficient" Education

Protecting education will mean the Governor and legislature have difficult decisions to make, including how to raise revenue. But that's their job as leaders — not protecting their political careers.

## Proposed Cuts Would Be the First-Ever State Cut to Education

At a time when most of us agree that education is more critical than ever, we need to honor our responsibilities and keep Pennsylvania's priorities moving forward.

## More State Funding Means Less Reliance on Property Taxes

Those who support drastic cuts to schools don't like to talk about this, but slashing state funding means more pressure on local communities to fund education — and that means higher property taxes. Quite simply — we need a better system for funding education.
